

FAULT EARTHQUAKE SCENARIO

Waiohau Fault
 Matahina Segment
 Richter Magnitude 6.4
 Depth 12 km
 Strike-slip fault
 Standard Crust

ISOSEISMALS
 (Modified Mercalli Intensity)

- MM 10
- MM 9
- MM 8
- MM 7

 (Bay of Plenty Regional Council)

Scale 1 : 500 000

New Zealand Map Grid projection

Map to accompany
 Institute of Geological & Nuclear Sciences Ltd
 Client Report 1999/116

COMMERCIAL-IN-CONFIDENCE: This map has been prepared by the Institute of Geological & Nuclear Sciences Limited exclusively for and under contract to Environment BOP (Bay of Plenty Regional Council). Unless otherwise agreed in writing, all liability of the Institute to any party other than Environment BOP in respect of the map is expressly excluded.

The active fault data have been compiled onto the NZMS260 topographic base at 1:50 000 from a variety of sources including aerial photography and field-based observation. These data should not be used for site-specific investigations.

The isoseismal ellipses measuring Modified Mercalli Intensity have been calculated using an earthquake attenuation model for a hypothetical coseismic fault rupture.
